

POND WIZARD[®] ALGAEICIDE

For Ponds, Dugouts Lagoons and Potable Water Tanks

DIRECTIONS FOR USE

Dilution of 1: 60,000 (16 mL per 1,000 litres of water) provide 1 part per million (ppm) of a biologically active form of copper (Cu⁺⁺). Use a copper test kit to determine existing copper level before adding **Pond Wizard Algaecide**. Do not exceed 1.0 ppm of copper in drinking water.

PONDS, LAGOONS, DUGOUTS: Product is to be applied for control of algae in industrial and farm ponds. Apply 1 litre of **Pond Wizard Algaecide** to 60,000 - 600,000 litres of water. Water condition and the extent of active micro-organisms present determine the effective application rate. For permanent algae control maintain 0.5 to 1.0 ppm Cu in the water. (Add 1.6 mL of **Pond Wizard Algaecide** per 1, 000 litres to increase Cu by 0.1 ppm).

Algaecide for animal drinking water tanks: Apply 1 litre of **Pond Wizard Algaecide** to 60,000 litres of water for prevention of algal bloom. Maintain a minimum of 0.7 ppm of copper⁺⁺ in animal drinking water.

COMMERCIAL USE: **Pond Wizard Algaecide** is an innovative formulation which provides an excellent control of algae in ponds, dugouts, lagoons and potable water storage tanks.

ENVIRONMENTAL HAZARDS - FISH AND AQUATIC ORGANISMS:

This product is toxic to fish, aquatic invertebrates and plants. Direct application of **Pond Wizard Algaecide** to water may cause a significant reduction in populations of aquatic invertebrates, plants and fish. Do not treat more than one-half of a pond or dugout at one time in order to avoid oxygen depletion originating from the decaying of the vegetation. Allow one to two weeks between treatments for the oxygen level to recover. Trout and other species of fish may be killed at application rates recommended on this label, especially in soft or acid waters. Do not contaminate water when disposing of equipment wash waters. (See disposal instructions.)

STORAGE: Store in a safe place away from pets and children. Store away from excessive heat. **Pond Wizard Algaecide** will freeze, causing separation. Always keep container closed. Store **Pond Wizard Algaecide** in its original container only. Do not store **Pond Wizard Algaecide** directly on concrete and store above 5°C.
